

## Guidelines for the Hands-on Session

- The participants are divided into groups
- A short presentation (5min) is provided at the beginning
- Each group must choose between two tools: EdCafe and MagicSchool
- Each group must interact with the chosen tool for 4 tasks:
  - Generate a Lesson Plan (12 minutes)
  - Generate content (12 minutes)
  - Generate assessment (12 minutes)
  - A tool of the group choice (12 minutes)
- For each of the 4 tasks:
  - Decide on the input to provide
  - Read and critically analyse the provided result
  - Discuss within the group the obtained results
  - Try to generate the same content with a general purpose chatbot like ChatGPT and compare
  - Try to answer the following questions:
    - Are the delivered results accurate?
    - Did I learn something from the delivered results? What?
    - Will using the tool make all teaching uniform? Why?
    - What is the optimal way of using the tool?
- Last 5 minutes to identify by all the groups 1 question:
  - One take-away idea
