

# AI-POWERED PRODUCTIVITY FOR EDUCATION, AN INTRODUCTION

AI  
WALID P. KARAM,  
PHD

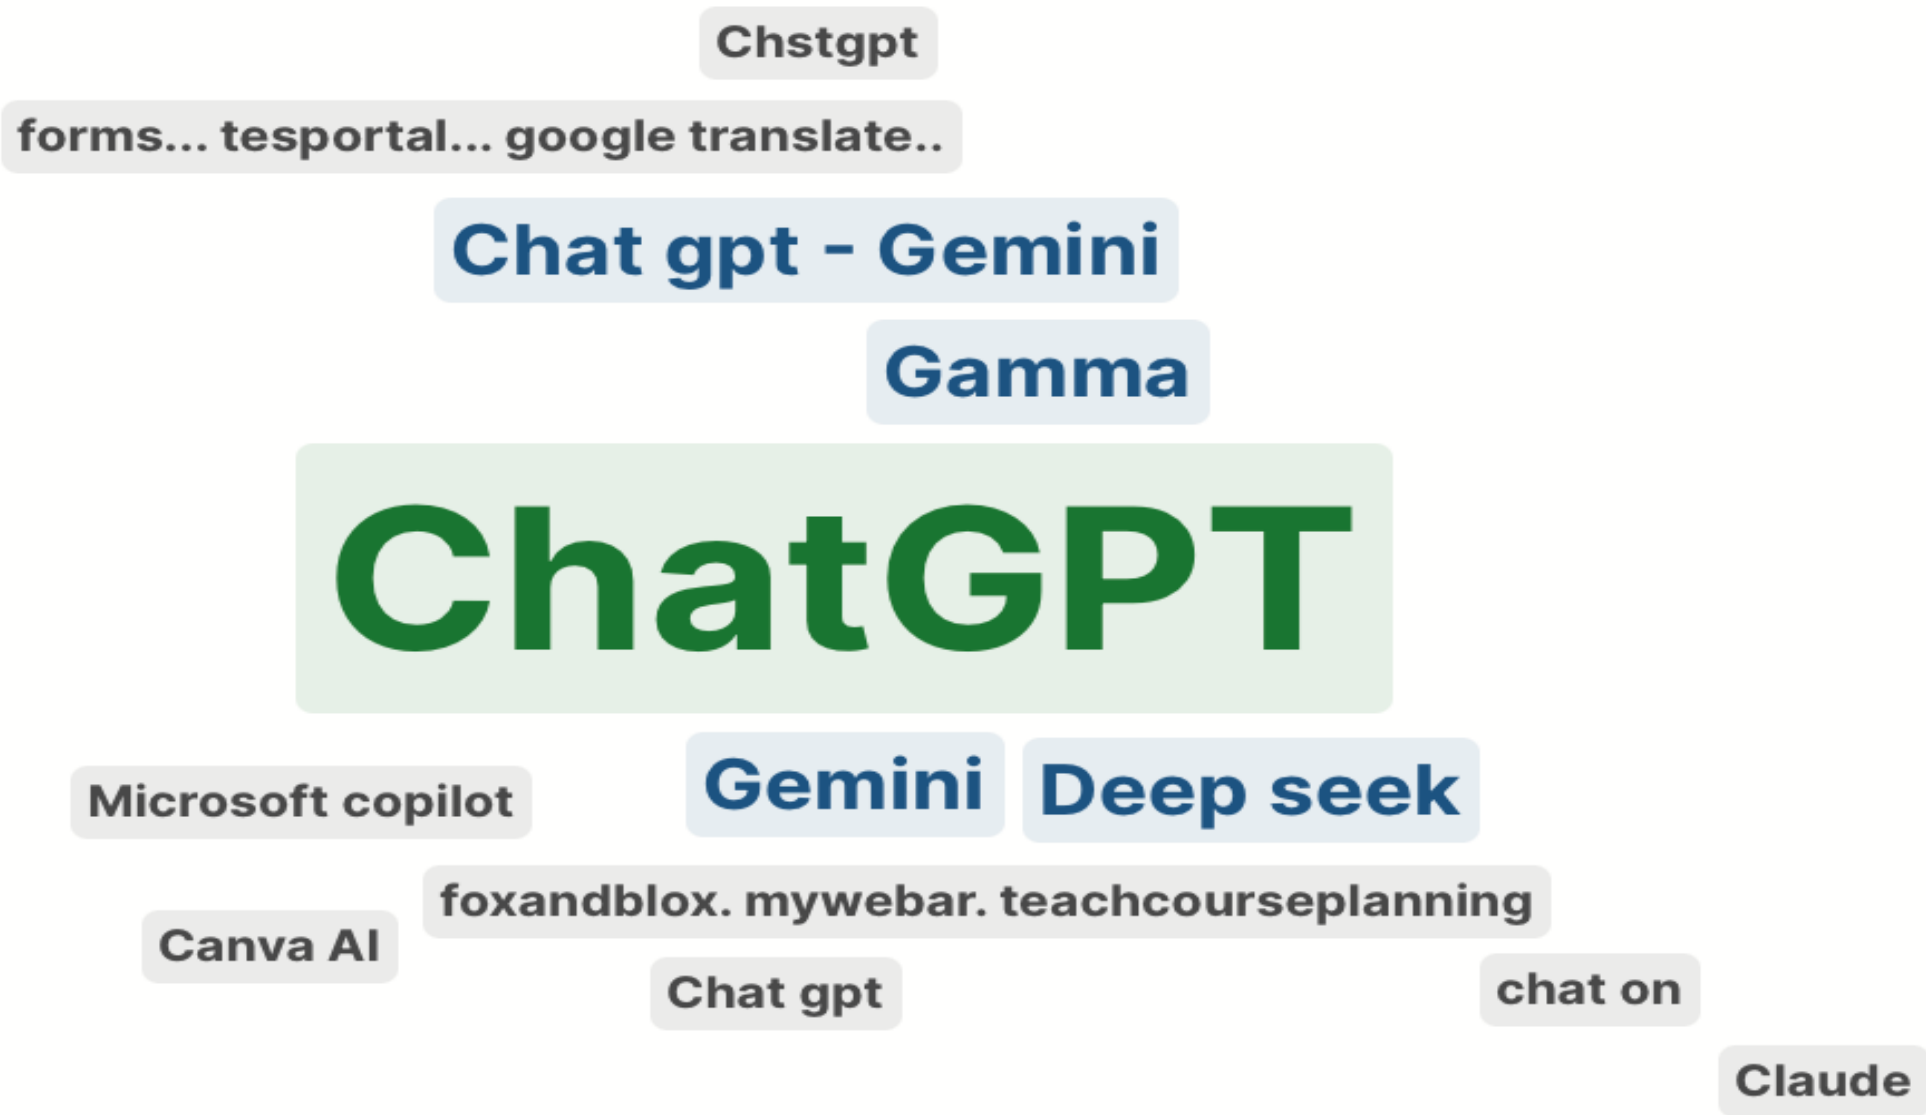

APRIL 26, 2025

What is the first thought that comes to your mind when you think of AI?  
شو أول فكرة بتجي على بالك لما بتفكر بالذكاء الاصطناعي؟

# Which AI tools do you use or are familiar with?

شو أدوات الذكاء الاصطناعي يللي بتستعملها أو معّود عليها

# WHAT IS AI?

Artificial Intelligence, a branch of computer science concerned with creating intelligent machines capable of mimicking human cognitive functions such as learning and problem-solving.

# THREE TYPES OF AI

- narrow or weak AI
- general or strong AI
- super AI

NARROW AI

GENERAL AI

~~WEAK AI~~

SUPER AI

Image created with ideogram

# NARROW OR WEAK AI (ANI)

- image recognition
- Speech recognition
- AI Chatbots
- Siri, Alexa
- Autonomous Vehicles
- Playing Games (Chess)

IBM Watson

- Machines can perform a specific limited task
- Fixed domain models provided by programmers
- Learns from thousands of labeled examples
- Reflexive tasks with no understanding
- Knowledge does not transfer to other domains or tasks

# GENERAL OR STRONG AI (AGI)

- Cognitive tasks
- Creativity, emotions
- Common sense

- Ability to learn, generalize, apply knowledge, plan
- Self-aware consciousness

Image created with Midjourney

# SUPER AI (ASI)

- Futuristic
- Surpasses human intelligence/abilities

- Dystopian science fiction
- Robots overrun, overthrow, enslave humanity

# 3 Types of Artificial Intelligence

## Artificial Narrow Intelligence (ANI)

Stage-1

### Machine Learning

- Specialises in one area and solves one problem

Siri

Alexa

Cortana

## Artificial General Intelligence (AGI)

Stage-2

### Machine Intelligence

- Refers to a computer that is as smart as a human across the board

## Artificial Super Intelligence (ASI)

Stage-3

### Machine Consciousness

- An intellect that is much smarter than the best human brains in practically every field

# HOW DOES ARTIFICIAL INTELLIGENCE WORK?

- processes large amounts of DATA
- uses algorithmic training and a set of rules
- predicts the outcomes
- learns from mistakes and repeats the process differently

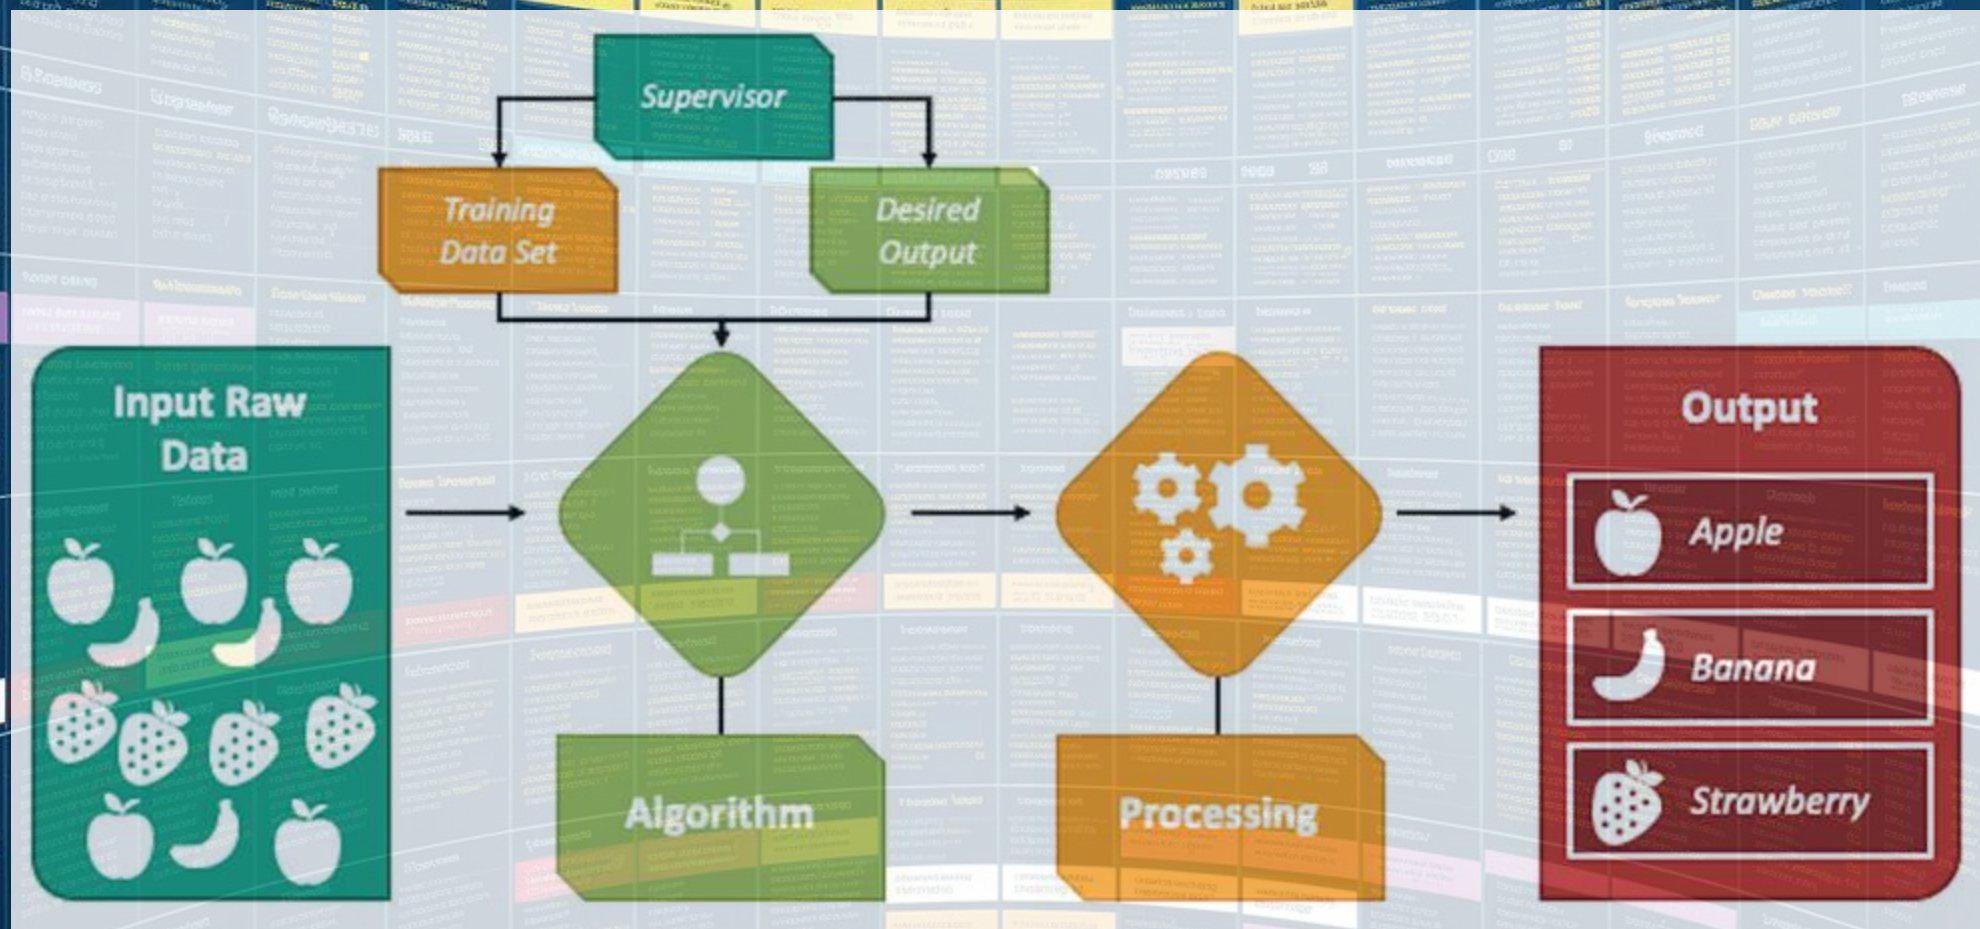

# WHAT IS ML?

Machine learning, a subset of AI, allows machines to learn from data without explicit programming.

- supervised learning
- unsupervised learning
- reinforcement learning.

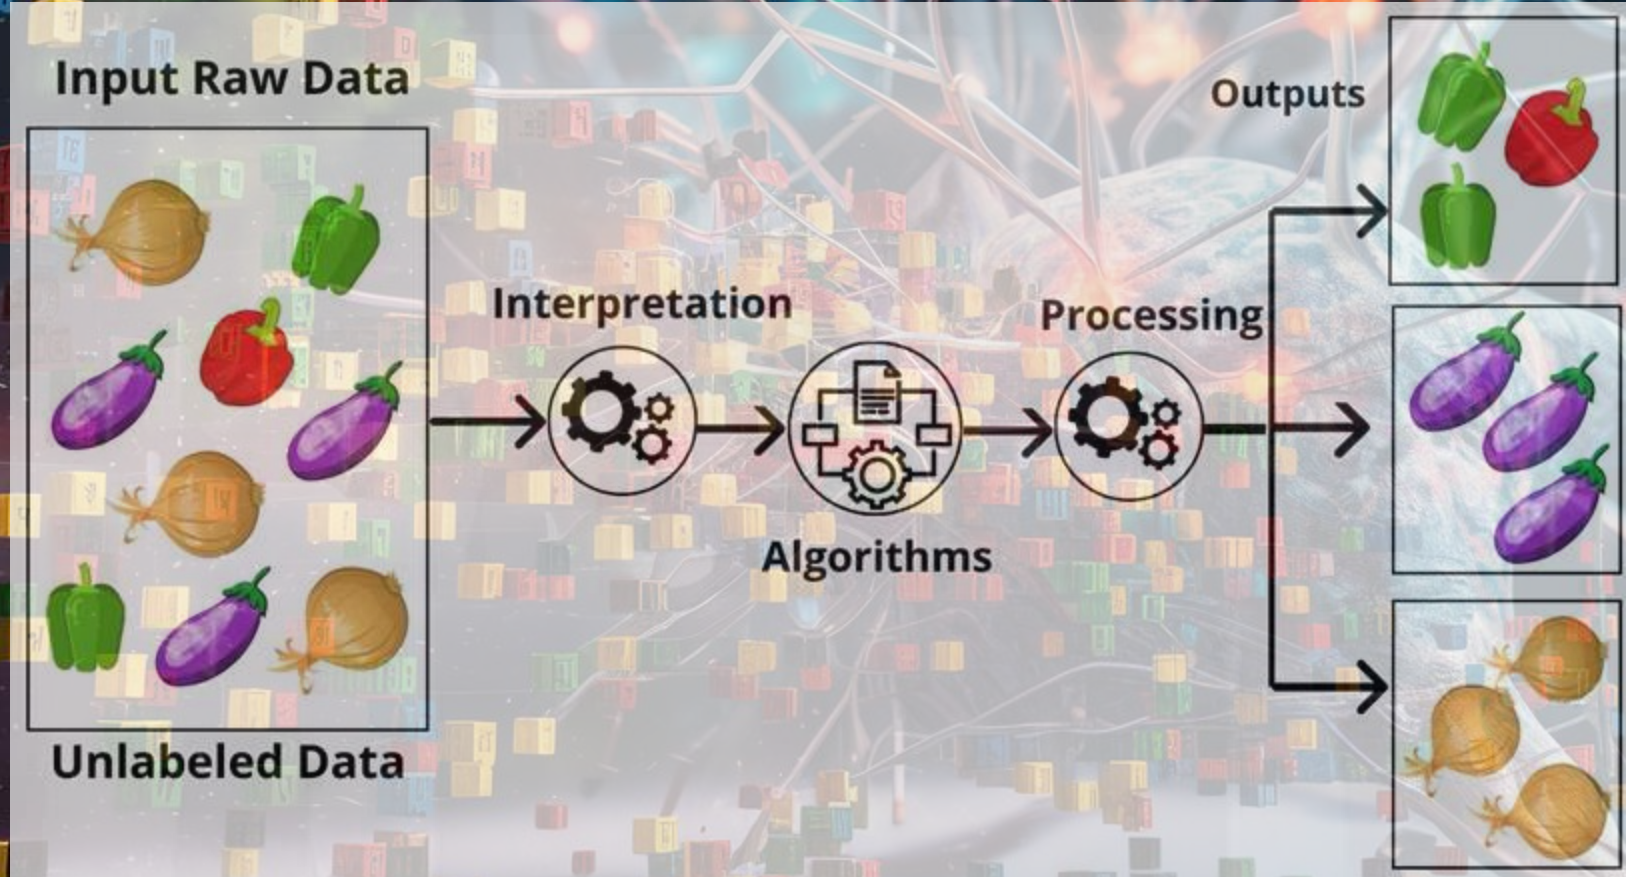

# SUPERVISED LEARNING

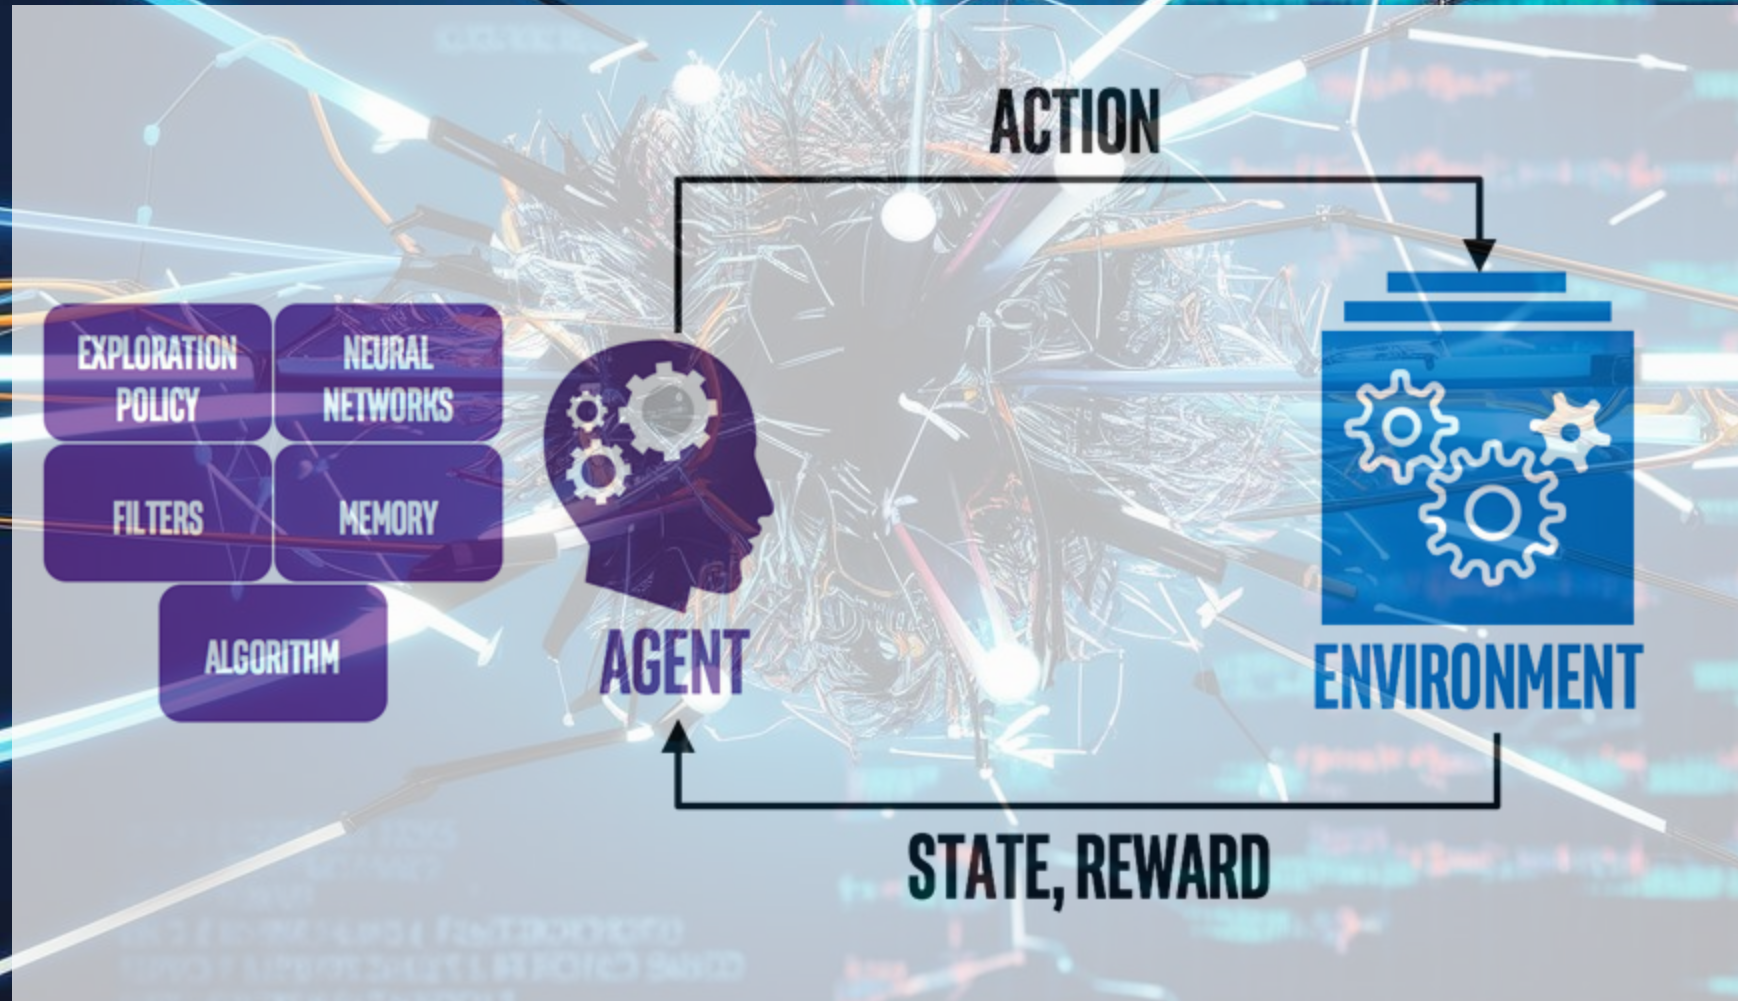

# UNSUPERVISED LEARNING

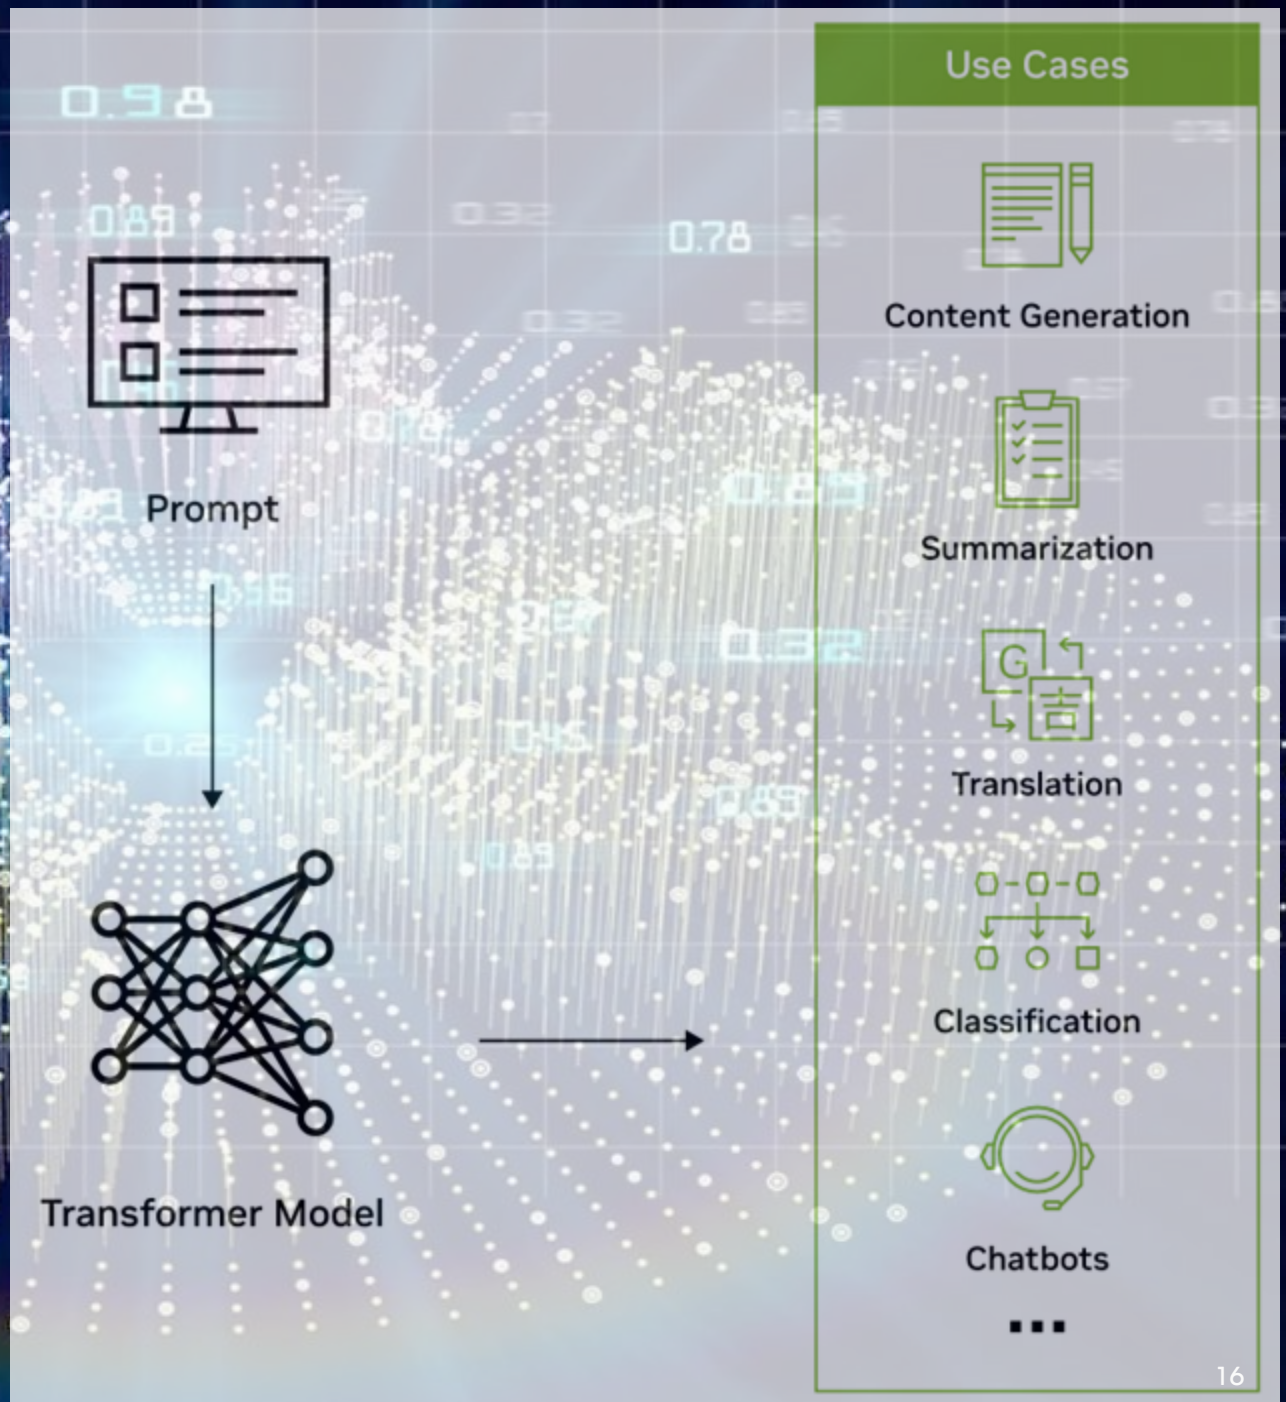

# REINFORCEMENT LEARNING

# LARGE LANGUAGE MODELS

A background image showing a group of business professionals in a meeting. They are gathered around a large table, looking at and pointing to documents and a tablet. The image is slightly blurred, focusing on the collaborative work environment.

# ADVANTAGES OF AI

- Good at detail-oriented jobs
- Reduced time for data-heavy tasks
- Saves labor and increases productivity
- Delivers consistent results
- Can improve customer satisfaction through personalization
- AI-powered virtual agents are always available

# DISADVANTAGES OF AI

- Increasing unemployment rates
- Lack of transparency
- Biased and discriminatory algorithms
- Disinformation
- Environmental impact
- Domination by Big Tech companies

# DEEP FAKE

# DEEP FAKE

# EXAMPLES OF AI TECHNOLOGY

- Automation
- Machine learning
- Machine vision
- Natural Language Processing (NLP)
- Robotics
- Self-driving cars
- Text, image and audio generation

# APPLICATIONS OF AI

- Healthcare/medicine
- Business
- Education
- Finance/banking
- Education
- Finance
- Law
- Entertainment and media
- Software coding and IT processes
- Security
- Manufacturing
- Transportation
- Agriculture

# HOW CAN A STUDENT BE INVOLVED?

- Education and Learning
  - Formal Education (Computer Science, data science, machine learning, and statistics)
  - Online Courses (Coursera, edX, Udacity, DeepLearning.ai, Codecademy, IEEE Learning Network, ...)
  - Books & Research Papers

# HOW CAN A STUDENT BE INVOLVED?

- Hands-On Experience
  - AI Projects – building machine learning models, developing chatbots, analyzing data, etc.
  - Competitions (Kaggle, hackathons, etc.)
  - Internships – real-world experience.

# HOW CAN A STUDENT BE INVOLVED?

- Communities and Networking
  - AI Clubs and Societies (IEEE, ...)
  - Online Communities (Reddit's r/MachineLearning, Discord servers, etc.)
  - Conferences and Meetups

A high-angle, warm-toned photograph of a student sitting at a light-colored wooden desk. The student, wearing a grey t-shirt and grey pants, is focused on a laptop in the foreground, with their hand on the trackpad. On the desk, there are several other devices: a laptop to the left, a large monitor to the right displaying code, and an open notebook in the center featuring colorful diagrams of celestial bodies. The background is softly blurred, showing a patterned rug and a window with natural light.

# HOW CAN A STUDENT BE INVOLVED?

- Build a Portfolio
  - GitHub Repository
  - Blogging and Content Creation

## HOW CAN A STUDENT BE INVOLVED?

- Stay Informed
  - AI News and Updates
  - Ethical AI Practices
- Mentorship
- Explore Interdisciplinary Opportunities

# HOW CAN I CREATE AN AI MODEL?

- Data Collection and Preparation
  - Python, Pandas, NumPy, Beautiful Soup, Scrapy
- Choose a Machine Learning Algorithm
  - Scikit-learn, TensorFlow, Keras
- Preprocessing and Feature Engineering
  - Scikit-learn, Feature-engine
- Model Training
  - TensorFlow, Keras, Scikit-learn
- Model Evaluation:
  - Scikit-learn, TensorBoard
- Iterate and Improve
  - Experiment Tracking Platforms (Mlflow, TensorBoard.dev)
  - AutoML Tools (Auto-Keras, Auto-sklearn, H2O.ai)
- Deployment
  - TensorFlow Serving, Docker, Flask or Django

# THANK YOU!
